### **Pleasure Vessel and Commercial Vessel Interaction**

A small craft cannot always be seen from a ship's bridge, this 'blind arc' can be up to one mile ahead and half a mile either side of the bow. If you cannot see the bridge the bridge cannot see you and the ship will not be able to take avoiding action.

Due to their size, ships in narrow channels may not have room to take avoiding action. You should not underestimate the speed of ships and if, near large vessels, you should ensure that you stay well clear and take evasive action, ensuring you obey the COLREGS
